

About Allintel

With over 6 years of experience in business intelligence, *Allintel* is the best resource for ensuring that your business intelligence, enterprise reporting and data warehousing initiatives are successfully designed, implemented, deployed, and embraced by your business. We are recognized as the expert in MicroStrategy implementation and our extensive field experience (over 70 clients in 25 states) is an invaluable advantage for the success of your MicroStrategy projects.

Our Mission

The mission of *Allintel* is to share our knowledge and expertise to ensure that your business intelligence projects will flourish and deliver maximum return on your investment. We are 100% committed to your success and strive on keeping abreast of the latest technologies and industry development to make you successful.

MicroStrategy Expert

Project Management - Leveraging our extensive experience is a key advantage for the success of your MicroStrategy implementation. With over 70 clients in all major verticals we have experienced a broad range of business intelligence projects allowing us to recommend the best approach for your specific business needs. Recognized as the expert in MicroStrategy implementation we are specialized in business intelligence architecture planning and design, development and deployment strategies, project audits, etc...

Technical Adviser - Our state-of-the-art technical knowledge coupled with years of experience enables us to design and implement the best solutions in the industry. Our expertise in web customization is an invaluable recourse when addressing your unique business challenges.

We are MicroStrategy-certified (MCE program).

Web Development

Allintel has years of experience in web-related solutions. The extensive knowledge gained from our field projects enables us to recommend the best industry standards. With our expertise of both ASP.NET and J2EE (we are Java Sun certified) we have gathered requirements, scoped, designed and implemented highly sophisticated solutions.

We have extensive experience in:

- MicroStrategy Web customization
- Portal development (intra and extranet)
- Back-end integration (database, business processes)
- Enterprise reporting solutions
- Security architecture and implementation
- Single sign-on
- Integration with mapping software
- Dashboard design and implementation
